Knowledge is that which liberates

APACI, in collaboration with the KIIT Deemed to be University in Odisha, the Influenza Foundation of India (IFI), the Association of Physicians of India (Odisha branch), the Regional Medical Research Center (RMRC-ICMR) and the Research Society for the Study of Diabetes in India is holding an Influenza Workshop in Bhubaneswar, on Sunday 11 March 2018, at the KIIT University campus.

The meeting will be ideal for Clinicians and other healthcare professionals, Medical Students, Virologists, Epidemiologists, and Government & Public Health Officials.

Workshop objectives will be to:

- Bring the latest information about influenza prevention to practicing and training health care professionals
- Raise awareness about those in the community that are at greatest risk of serious complications, in particular those with non-communicable diseases
- Review surveillance in the region and measures used to determine burden of disease.
